Additionally, we have to put the following policies in place to keep you, your family and our staff as safe as possible.

### What We Will Do

- Screen our research staff prior to their shift for COVID-19 symptoms.
- Wear a mask at all times during your visit, as well as other PPE when appropriate.
- Sanitize our testing rooms before and after each visit. Also clean public places frequently.
- Structure visits and testing to reduce the amount of time you are in office. Some tasks will be done remotely.

### What We Will Ask You To Do

The day before your visit, a researcher will call and screen you for potential symptoms of COVID-19.

- **Only 1 person**
  
- Meet research staff outside study buildings. Unless specially arranged, your study partner will not come with you inside the building.
  
- Maintain social distancing (6 feet) whenever possible.

- Use hand sanitizer or wash hands frequently, and immediately upon entering the building.

- When you arrive, staff will take your temperature. If your temperature is greater than 100.0, you will not be able to participate that day.

- We will reschedule your visit after 14 days.

- All study activities require mask use at all times. You will be provided with a fresh, clean mask for you to use during your visit.

- We also require that you not travel outside of the US or to certain high risk states within 14 days prior to your visit.

We encourage you to self-monitor for symptoms of COVID-19 prior to your visit, and for 14 days afterwards. Please inform us if you or someone in your home develops symptoms.

Thank you for your commitment to research at the Mesulam Center!
